

**INCIDENT MANAGEMENT SITUATION REPORT
THURSDAY, MAY 5, 2005 – 0530 MDT
NATIONAL PREPAREDNESS LEVEL 1**

CURRENT SITUATION:

Nationally, initial attack activity was light with 122 fires reported. One large fire was contained in the Alaska Area. Very high to extreme fire indices were reported in Arizona, Nebraska, Minnesota, Wisconsin, and Texas.

INCIDENT NAME	ST	UNIT	SIZE	% CTN	EST CTN	TOTL PERS	CRW	ENG	HELI	STRC LOST	\$\$\$ CTD
TRACY AVENUE	AK	KKS	4,800	100	---	120	4	2	3	1	500K

KKS = Kenai Kodiak Area Forestry

OUTLOOK:

Weather Discussion: In Alaska, high pressure will begin to build over the area for slightly warmer and drier weather in the interior but with some moisture continuing over the Kenai Peninsula. In the Southwest, high pressure will begin to give way to an approaching upper level trough moving in from the west. In the South, dry weather is on tap west of the Mississippi River with rain to the east. Elsewhere, warm, gusty winds are expected over portions of Wisconsin and Minnesota.

Geographic Area Weather	High Temperatures	Minimum Relative Humidity	Wind
Southern California Showers with snow above 6,000 feet.	45 to 65 mountains. 60 to 70 valleys. 68 to 75 upper deserts. 78 to 88 lower deserts.	50 to 70%.	Southwest to northwest 10 to 20 mph.
Alaska Interior... Partly sunny. South Central... Mostly cloudy a few showers near the coast. Southeast... Mostly cloudy with showers.	50s and 60s.	Interior...30% to 40%. South Central... 35% to 45%. Southeast...above 45%.	10 to 15 mph.

POWER LINE SAFETY

Operating near or under power lines poses unique hazards, and the following precautions should be followed to reduce potential equipment damage or injury:

- If possible, the power company should deactivate lines in the fire area.
- Don't operate heavy equipment under power lines.
- Don't use right-of-ways as a jump or cargo drop spot.
- Don't drive with long antennas under power lines.
- Don't stand near power lines during retardant drops.
- Don't park under power lines. The magnetic field around energized power lines can induce an electrical charge in ungrounded vehicles or equipment. This charge can shock anyone who touches the vehicle.
- Don't apply straight stream to power lines.
- All personnel should be cautioned that smoke may become charged and conduct the electrical current. Deactivated transmission and distribution lines may continue to pose a hazard due to induction.
- If power lines fall on your vehicle, DON'T leave the vehicle until the power company arrives. If the vehicle is on fire or fire is near, jump clear, don't hang on, keep feet together, and bunny hop away.
